

REMARKS

The above claims have been amended. The first independent claim 1 incorporates the limitations as recited in the originally presented claims 2, 3 and 4
5 whereby the locating member comprises an edge portion having the locating surface extending around the axis of rotation of the bevel member where the bevel member and the locating member are adjustably immovable with respect to one another along the axis of rotation of the bevel member, where the locating member has a side wall defining a recess to have the bevel member received
10 therein. The claim is to be broadly interpreted to the various methods of adjustably repositioning the bevel member with respect to the locating member. Claims 3 -- 4 are canceled, and the depending claims upon the independent claim 1 are amended to properly depend upon the first independent claim.

The method claim is believed to be removed from the restriction
15 requirement.

If there is any matter which could be expedited by consultation with the Applicant's attorney, such would be welcome. The Applicant's undersigned attorney can normally be reached at the telephone number set forth below.

Signed at Bellingham, County of Whatcom, State of Washington this April
20 17, 2006.

Respectfully submitted,
DOUGLAS SCHEFFER,
